

## **Introduction**

Mr. Manager provides an ideal platform to store details of company's employees and log their attendance on daily bases. It also calculates employee's salary at the end of the month on hourly basis.

Businesses can move away from Excel, Access or other home-grown tools and manage employees the right way with Mr. Manager. It allows company to effectively track all information about employees. Items such as Name, Designation, Employee ID, Department, DOB etc.

## **Features**

- Authentication: A company can easily make a secured account and start storing its employee's data and mark their attendance.
- Log Attendance: Easily mark multiple in-times and out-times of an employee and calculates number of hours worked on that particular day.
- Monthly Attendance: One can easily retrieve attendance of any month and also view the number of hours worked in that particular month along with calculated salary based on the number of hours worked.
- Employee's Details: Shows comprehensive details of each employee along with the option of editing/deleting employee's details.
- Filter Form: Allows one to filter an employee based on any of the employee's credentials and easily view or mark attendance of that particular employee.

## **Scalability**

- It will benefit a lot of companies to smoothly store their employee's data and mark attendance.
- The secured authentication with passport will motivate companies to store their employee's information safely.
